PROFESSIONAL SUMMARY

Information Technology undergraduate with hands-on experience in Python full-stack development and Data Analytics. Adept at building intelligent systems, AI agents, and analyzing large datasets to drive data-driven decision-making. Driven by continuous learning and seeking a challenging role in the software industry to leverage technical skills in real-world problem-solving and automated solutions.

EDUCATION

Bachelor of Technology in Information Technology	2024 – 2028
<i>Bonam Venkata Chalamayya Institute of Technology and Science</i> CGPA: 9.00/10	
Senior Secondary (XII), Science	2024
<i>Aditya Junior College</i> Percentage: 85.00%	
Secondary (X)	2022
<i>Sri Balaji Convent High School</i> Percentage: 85.00%	

SKILLS

- **Technical Languages:** Python, C, SQL, HTML, CSS
- **Full Stack Development:** Python Full Stack Development, Django, REST API Development, Database Design, Responsive Web Development
- **Core Computer Skills:** System Design, Object Oriented Programming, Data Structures & Algorithms, Database Management System
- **Cybersecurity & Emerging Technologies:** Cybersecurity, Ethical Hacking, Machine Learning, Natural Language processing(NLP)
- **AI & Modern Development:** AI Assisted software Development, Vibe Coding, Prompt engineering, Generative AI Tools(ChatGPT, Git Hub, Copilot, Cursor AI, Google AI Studio, Stitch), AI Driven Prototyping
- **Data Analytics:** Python(Pandas, Numpy, Matplotlib, Seaborn), Ms. Excel, Tableau, Power BI, Data Visualization, Data Analytics
- **Tools & Platforms:** Git, Git Hub, VS Code, Linux, Jupyter Notebook
- **Professional Skills:** Problem-Solving, Critical Thinking, Team Collaboration, Leadership, Adaptability

WORK EXPERIENCE

Data Analytics Intern <i>TalentShine Pvt .Ltd.</i>	Dec 2025 –Apr 2026
• Cleaned, structured, and managed large data sets to ensure data quality and accurate analysis. • Analyzed transactional data using Python(Pandas, NumPy, Matplotlib) to extract key insights and support decision-making. • Performed exploratory data analysis(EDA) to identify trends, patterns, and anomalies. • Collaborated with cross-functional teams to understand business requirements and translate them into actionable analytical solutions.	
Cyber Security Intern <i>ExcelR Solutions</i>	May 2026 – July 2026
• Conducted vulnerability assessments and security analysis to identify potential system risks.	

- Gained hands-on experience in network security, ethical hacking, and threat detection techniques.
- Assisted in security audits, incident response activities, and implementation of cybersecurity best practices
- Prepared security reports and documentation, recommending mitigation strategies for identified vulnerabilities.

Campus Body Member | *GeeksforGeeks*

Jan2026– Present

- Promoted coding culture by organizing sessions and mentoring students in Data Structures, Algorithms, and Problem-solving.
- Boosted campus engagement by spreading awareness of learning resources and technical opportunities.

PROJECTS

Material Recycling Platform (Ongoing)

May2026 – Present

- Developing a web-based application designed as a reverse commercial engine for material recycling.
- Establishing professional folder architecture, system naming conventions, and scalable codebase structures for the platform

Phishing Detection System

Dec 2025 –Apr 2026

- Developed a detection system capable of identifying malicious content across emails, SMS messages, URLs, and QR codes.
- Integrated machine learning and rule-based approaches to analyze text patterns and suspicious keywords, improving real-time cybersecurity detection.

AI-Based Career Path Recommendation System

Jun2025 –Oct 2025

- Built a recommendation engine leveraging Natural Language Processing (NLP) to extract skills and education data from user resumes.
- Implemented resume parsing, tokenization, and feature engineering to match candidate profiles with relevant career domains and suggest skill gaps.

Traffic Management System

Jun2025 –Nov 2025

- Designed an intelligent monitoring system to analyze real-time traffic conditions and optimize signal timings dynamically.
- Implemented vehicle detection and traffic density analysis to reduce intersection waiting times and minimize congestion.

CERTIFICATIONS

- **Goldman Sachs** - Internal Audit Job Simulation
- **Walmart USA** - Advanced Software Engineering Job Simulation
- **Tata-Gen AI** Powered Data Analytics Job Simulation | Forage
- **Introduction to Computer Science(CS50)** | Harvard University
- **Natural Language Processing** | Microsoft
- **Introduction to Large Language Models & Generative AI** | IBM Skills Build
- **Introduction to Cybersecurity** | Cisco Networking Academy
- **Introduction to Cloud Computing** | IBM Skills Build

ACHIEVEMENTS&EXTRACURRICULARS

- Selected as a finalist in IEEE YESIST 2025 and presented a solution on an "AI-powered hydroponic microgrid agriculture system" at Universiti Kebangsaan Malaysia (UKM).
- Actively research job market trends, read financial literature, and develop problem-solving business ideas.
